

Errata and Bonus Counters

Errata and Expansion Counter Sheet: This sheet was included in the packaged game. Fortunately, we caught several errors before shipping and were able to print an extra half sheet of counters. The top 4 rows, except for the PRC markers, are errata counters. For the most part, it's self-explanatory, but here are some notes on what isn't:

- a. The USN AMPH is an addition, not a replacement. It's required to fulfill all the AMPHs called for in Reinforcements.
- b. The 8 USN F-18s should replace the 8 USN F-18s with 3*-3-3* ratings (the reverse sides are incorrect).
- c. The Commonwealth F-18 replaces the CW F-18 (4*1-1*) that has no Pilot rating on its reduced side.
- d. The DPRK MiG-21PF replaces the MiG-21PF that has the same values on both sides (2-0-0).
- e. The DPRK MiG-23 replaces the MiG-23 which has a "0" Pilot rating on its reverse side.
- f. The JPN F-15J replaces the F-15J which has a "+1" Pilot rating on its reverse side.
- g. The rest of the top 4 row of counters replace their respective unit counters: ROK 69m/VIII and 3A (3d Army) HQ, DPRK KGD Arty HQ and 103rd/V Arm Bde, US 1st Div HQ.
- h. The Strike counters are simply extra markers.
- i. The bottom portion of the counter sheet contains additional Chinese and new Russian counters for use in a future expansion.

15. USAF F-22s and one of the F-35s has the "Stealth" designator in the wrong spot. It should be in the upper left.
