

Allocate 1 or 2 Strike Air Units
from the Ready Box with a Strike Rating of 1 or more [23.1]

No more than 4 units can participate in a given Strike mission:
1-2 Strike units + 1-2 non Strike units (Defense Suppression and/or Escorts)

Air Strike Targets [23.4]

- Detected enemy ground unit, Naval unit, HQ, MSU, Supply Depot
- Enemy Installation, Airfield, Bridge, Beachhead
- Enemy Air Defense Track (Detection, SAM, AAA)
- Any hex to interdict movement

- Preparing & Allocating the Mission
- Detection
- Resolving Air Defenses

Naval Strike Notes:

- Strikes vs. Naval Units in an All-Sea hex may use Normal ADF or their own. [17.1.4]
- Strikes vs. Naval Units in In Shore or At Sea Boxes/Sea Zone use the best Naval Unit ADF in that location. [17.1.4]
- Any "D" result from a Naval Unit detection when using its own ADF values is considered an "ED" result if the target is a Naval Unit. [17.1.4]
- Naval AAA may ALWAYS fire prior to Strike or Cruise Missile resolution against that unit, regardless of detection. [17.1.4]
- Carrier-based Naval Air Units receive an additional -1 DRM when conducting a Strike against a Naval Unit [17.1.4]. The GSR will define which Air Units are Naval Air Units.
- Any Air Unit in the Air Superiority Box can be used as an Interceptor for a Strike against Naval Units in an All-Sea hex, Port, or Inshore Box if within the intercepting unit's range. Naval Air Units in the Ready Box on a CV/CVN in the same At Sea Box/Sea Zone or Inshore Box as the Strike can be used as Interceptors against a Strike in either Box. [17.1.4]

Air Transport:

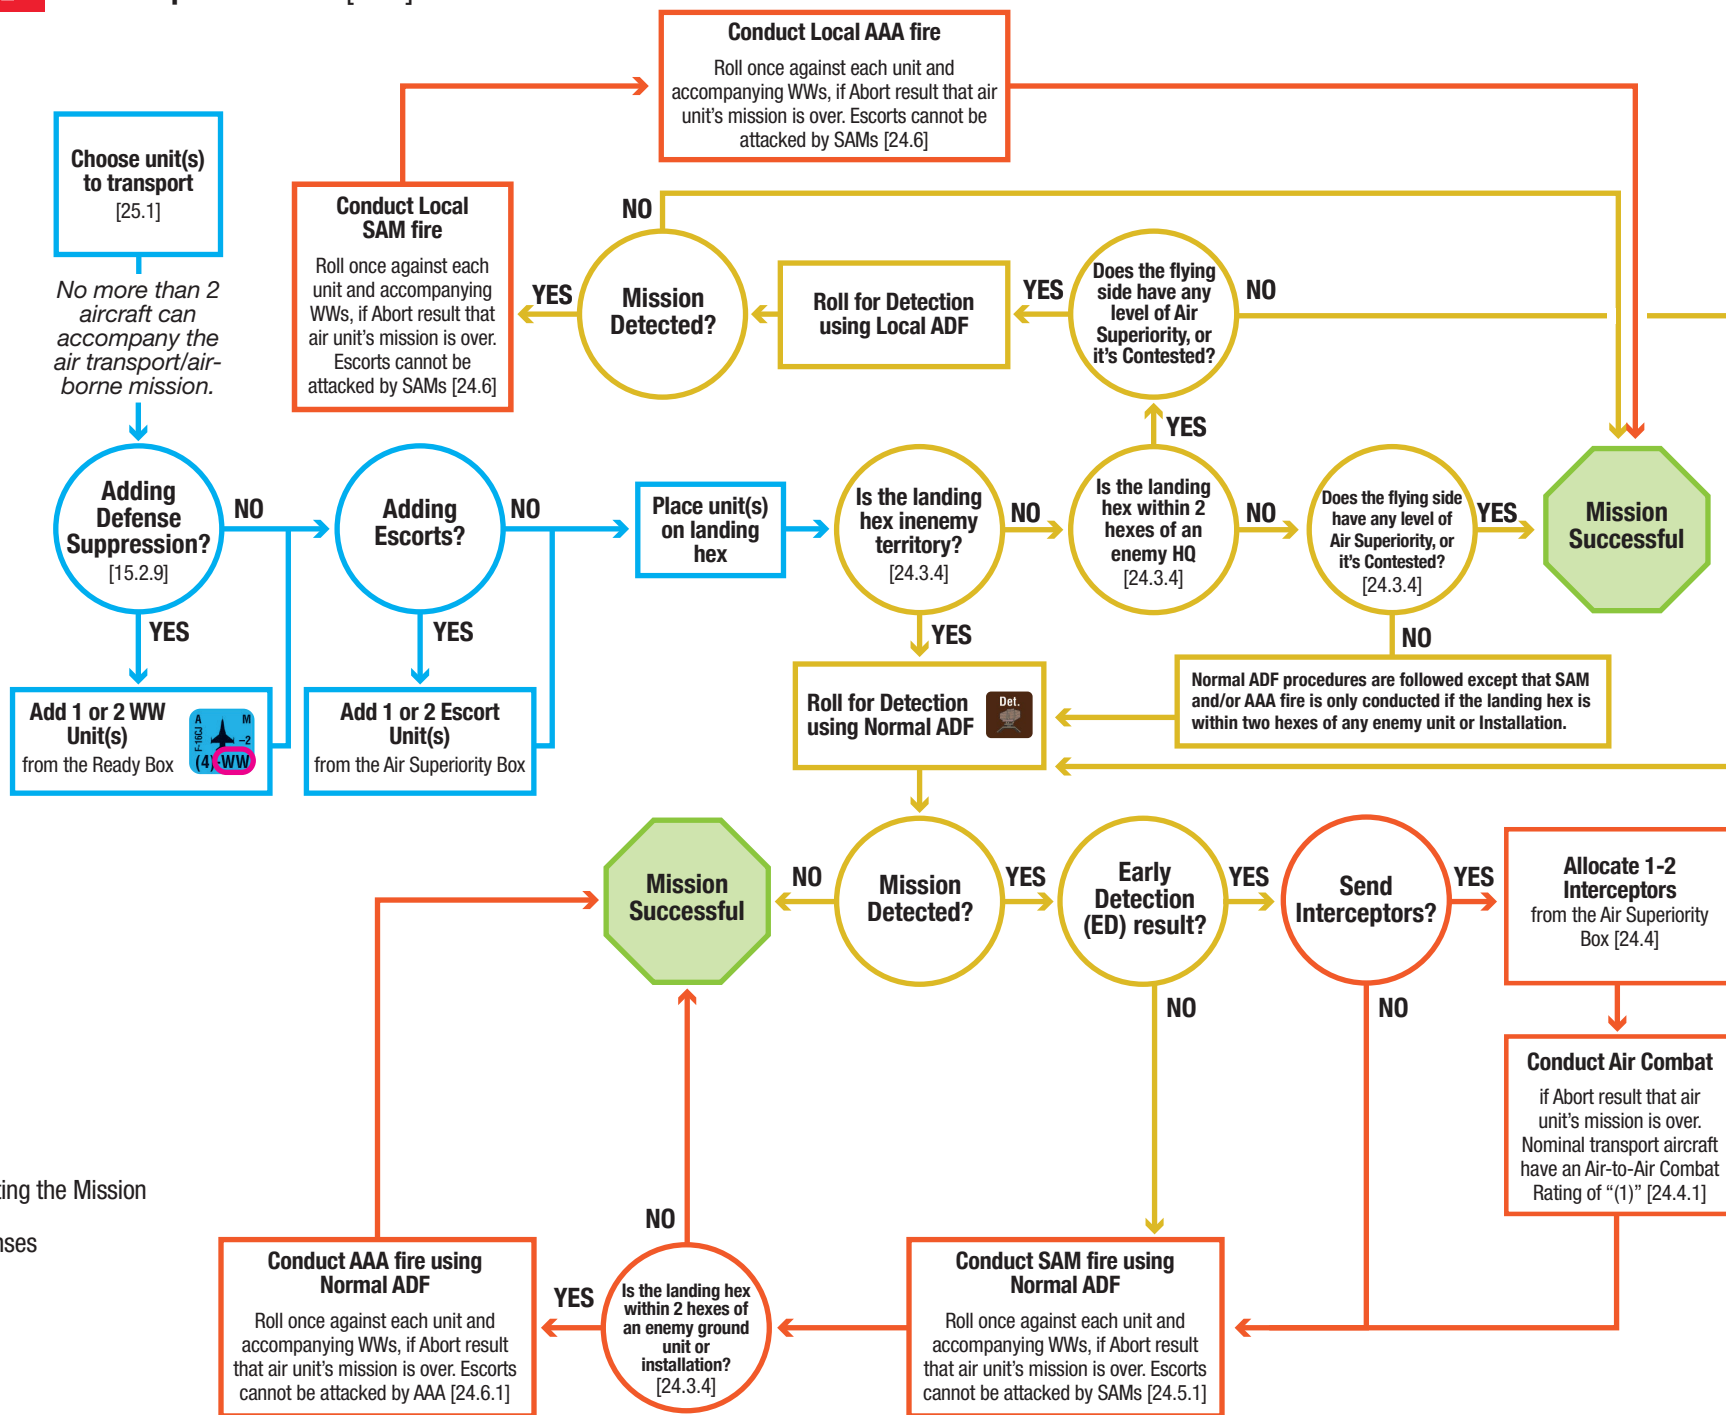

- Leg ground units that begin a Movement Segment on a friendly Airbase/Airfield that is not in an EZOC.
- Can move to another friendly-controlled Airbase/Airfield hex that is not in an EZOC.
- Nominal transport aircraft have an Air-to-Air Combat Rating of "(1)"

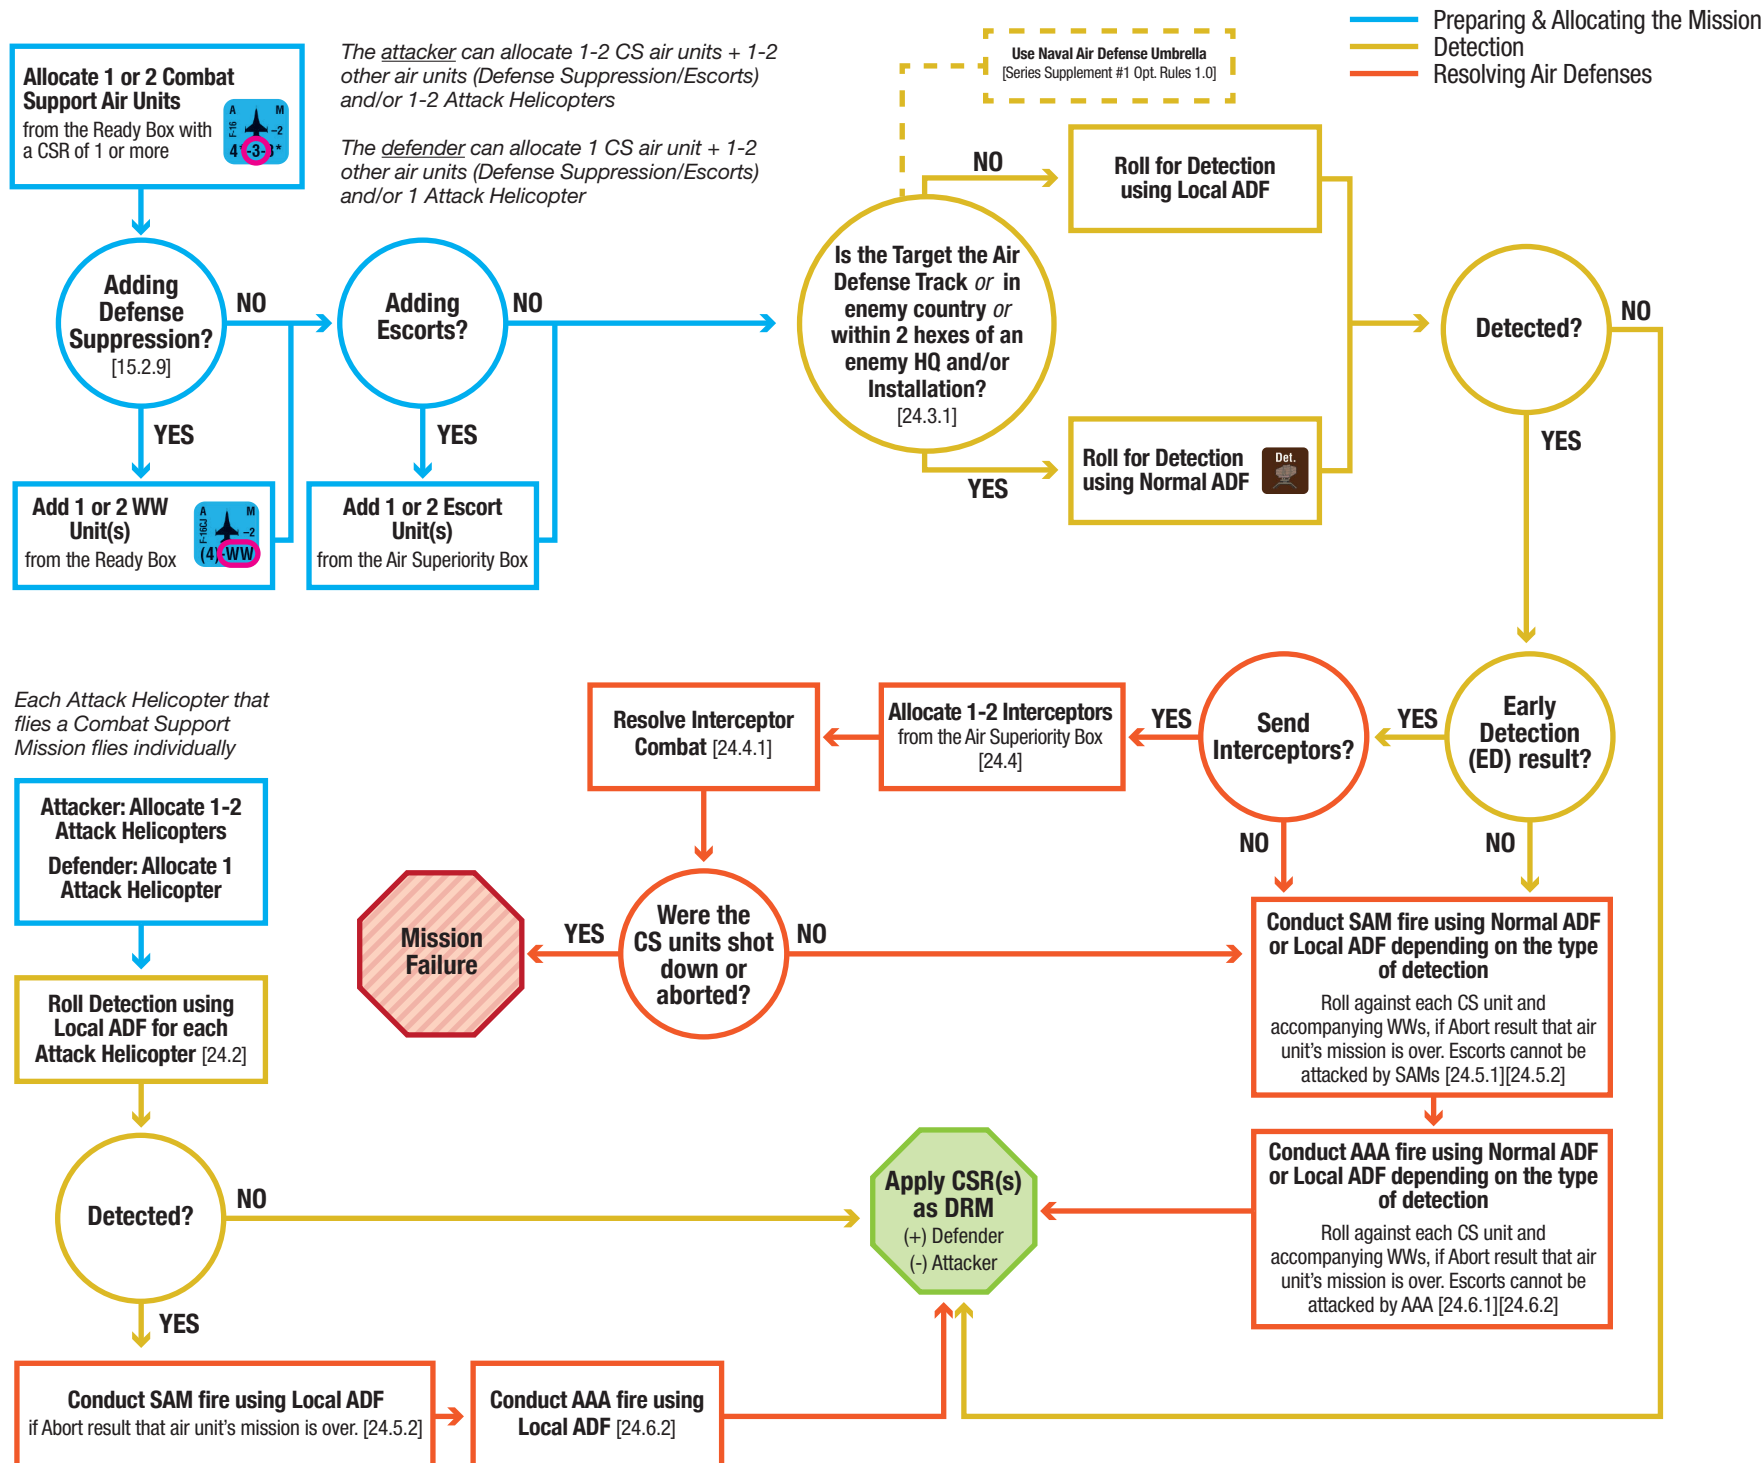

Airborne Paradox:

- Airborne units that begin a Movement Segment on a friendly controlled Airbase/Airfield not in an EZOC.
- The drop hex may not be occupied by enemy units.
- Paradoxes cannot be made into the following types of hexes:

Urban.
Mountain/High Mountain.
Highland/Highland Woods.
Any hex containing a City.
Any hex in an enemy country containing an Installation

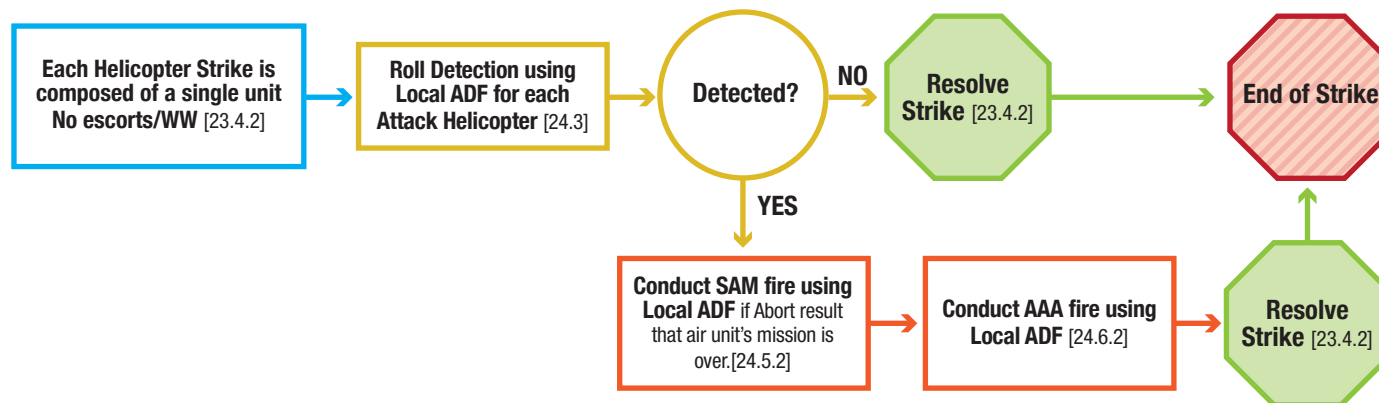

- Preparing & Allocating the Mission
- Detection
- Resolving Air Defenses

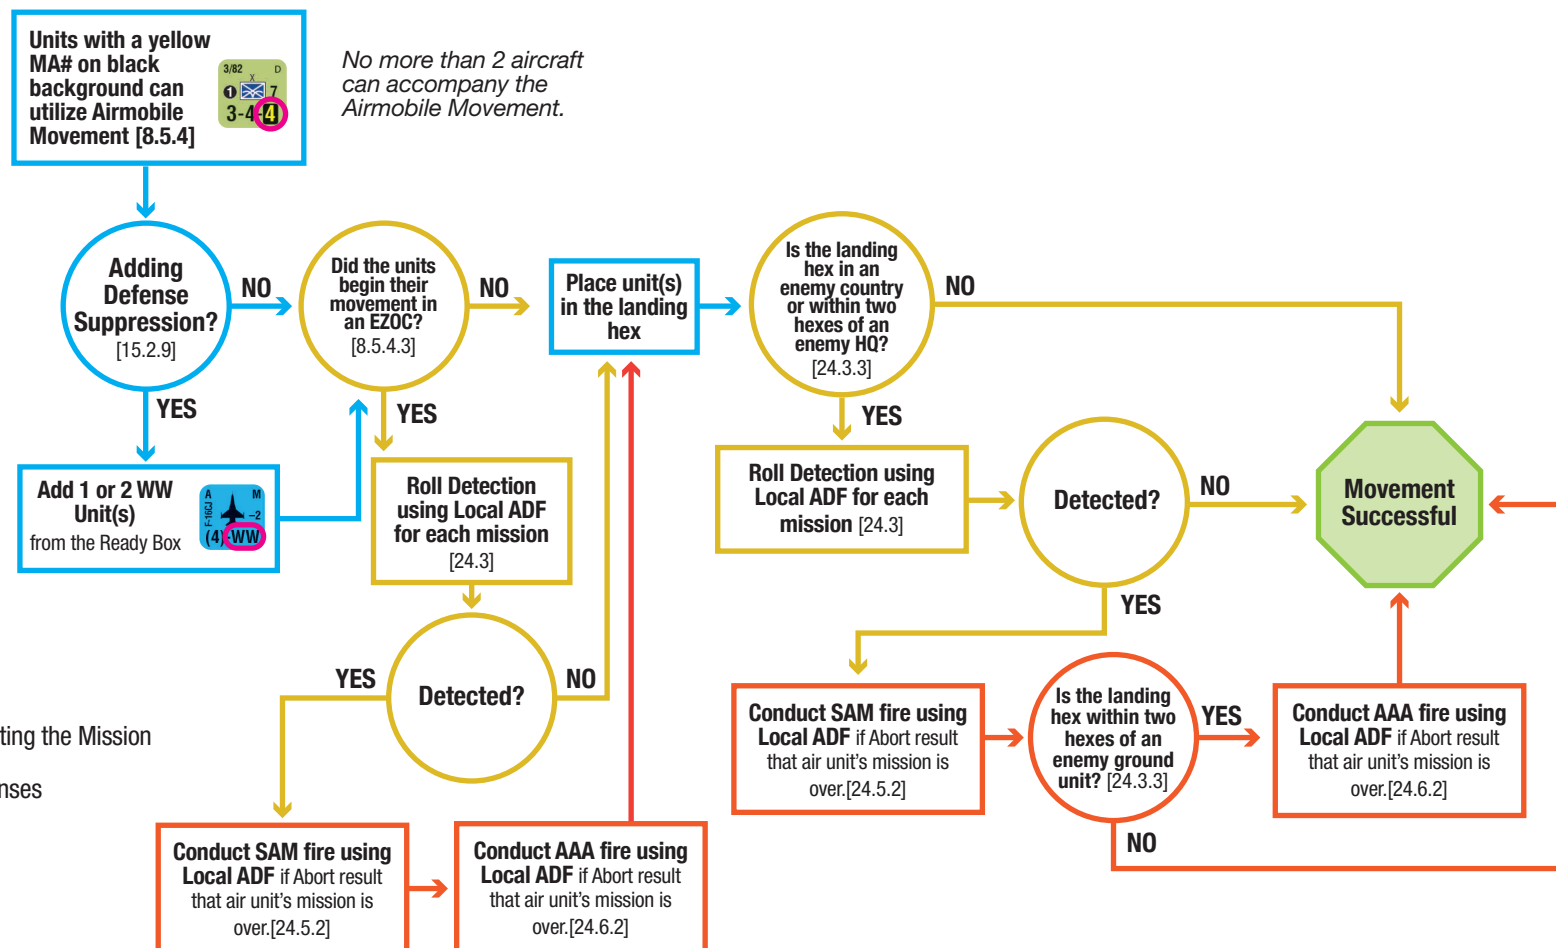

Helicopter Strike Targets [23.4]

- Detected enemy ground unit, Naval unit, HQ, MSU, Supply Depot
- Enemy Installation, Airfield, Bridge, Beachhead
- Any hex to interdict movement

Airmobile Notes

- Using Airmobile Movement a unit(s) move up to 24 hexes ignoring all terrain costs.
- No Airmobile Movement from or to Airbases/Airfields which have a "Strike 2" marker or destroyed.
- No landing in:
 - Highland w/no road
 - Highland Woods w/no road
 - Mountain w/no road
 - High Mountain
 - Enemy controlled Urban, City, Installation

- Preparing & Allocating the Mission
- Detection
- Resolving Air Defenses
